# INTRODUCTION

The 2021 edition of the 'Data & Trends of the EU Food and Drink Industry' report offers a comprehensive picture of the structure and economics of Europe's food and drink sector, one of the largest manufacturing industries in the EU in terms of turnover, value added and employment.

The report provides in-depth analysis of the Single Market, world markets, and a global ranking of food and drink companies. Most of the data related to the structure of the food and drink sector date back to 2018 and 2019. To find out more about the impact of the Covid-19 pandemic on the sector, you are invited to join our mailing list to receive Quarterly Economic and Trade Bulletins.

This report covers the whole EU27 food and drink industry, which is identified by the NACE Rev2 codes C10 (food products) and C11 (drinks). Therefore, unless otherwise stated, the UK is no longer included in the EU data presented in this report.

All figures presented here come from official sources and have been reviewed by FoodDrinkEurope.

# CONTRIBUTION TO THE EU ECONOMY

A leading manufacturing sector in terms of turnover and value added

**1.9%**

Contribution of the food and drink industry to EU gross value added

**14.2%**

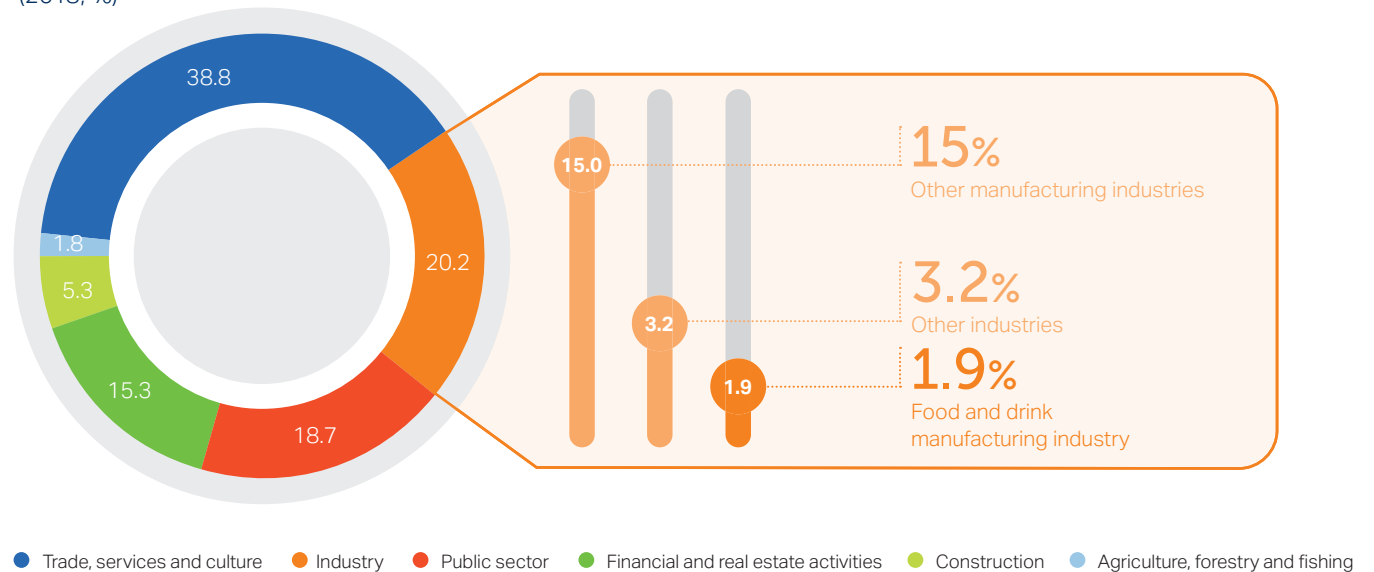

Share of food and drink turnover in manufacturing

**11.4%**

Share of food and drink value added in manufacturing

- The food and drink industry is a major contributor to Europe's economy, together with the automotive and machinery and equipment industries.
- In 2018, the EU food and drink industry generated a turnover of €1,093 billion and a value added of €222 billion.
- With €41 billion invested in 2018, the food and drink industry is the manufacturing sector with the highest capital spending.
- The industry maintains the characteristics of a stable, resilient and robust sector.

# EMPLOYMENT

A leading employer in the EU

**4.52 million**

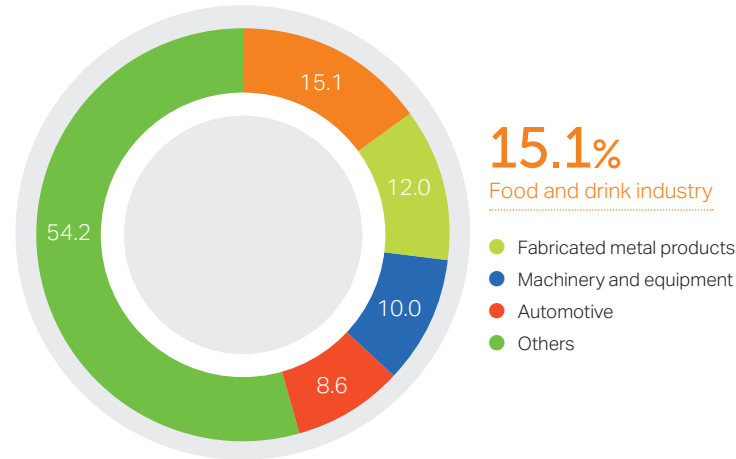

Total number of persons employed in the food and drink industry

**€105 billion**

Wages and salaries paid by the food and drink industry

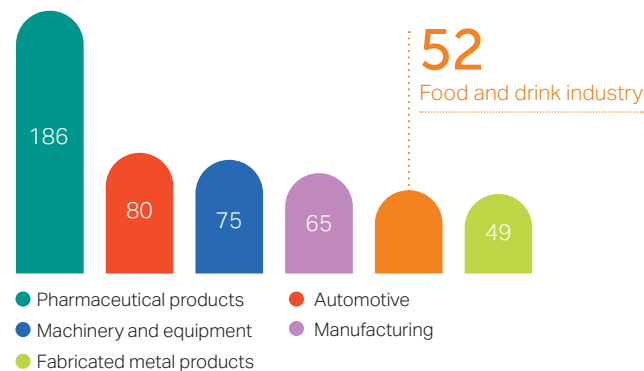

- Compared to other manufacturing sectors, the EU food and drink industry is a key job provider and a stable employer.
- On average, labour productivity in the food and drink industry is lower than in the manufacturing sector as a whole.
- A food and drink company employs on average 16 persons, i.e. 1 more than the average manufacturing company.

# SECTORS AT EU LEVEL

Offering a wide variety of food and drinks to consumers

**20%**

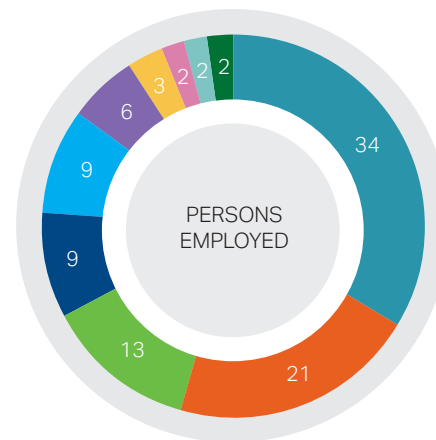

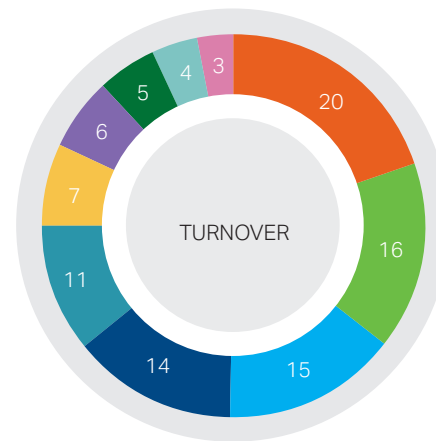

Share of the food and drink industry's turnover attributed to the meat sector

**34%**

Share of the food and drink industry's employment attributed to the bakery and farinaceous sector

- The EU food and drink industry is diverse, with a variety of sectors ranging from fruit and vegetable processing to dairy production and drinks.
- The top 5 sub-sectors (bakery and farinaceous products, meat products, dairy products, drinks and the "various food products" category) represent three-quarters of the total turnover and more than 80% of the total number of employed persons and companies in the industry.
- Labour productivity varies by sub-sector. Drinks and animal feeds generate the highest value in the food and drink sector.

**TURNOVER, VALUE ADDED, PERSONS EMPLOYED AND NUMBER OF COMPANIES IN FOOD AND DRINK INDUSTRY SECTORS (2018, %)**

**LABOUR PRODUCTIVITY (2018, €1,000/person)**

- Meat products
- Various food products
- Dairy products
- Drinks
- Bakery and farinaceous products
- Animal feeds
- Processed fruits and vegetables
- Oils and fats
- Grain mill and starch products
- Fish products

# SMALL AND MEDIUM-SIZED ENTERPRISES

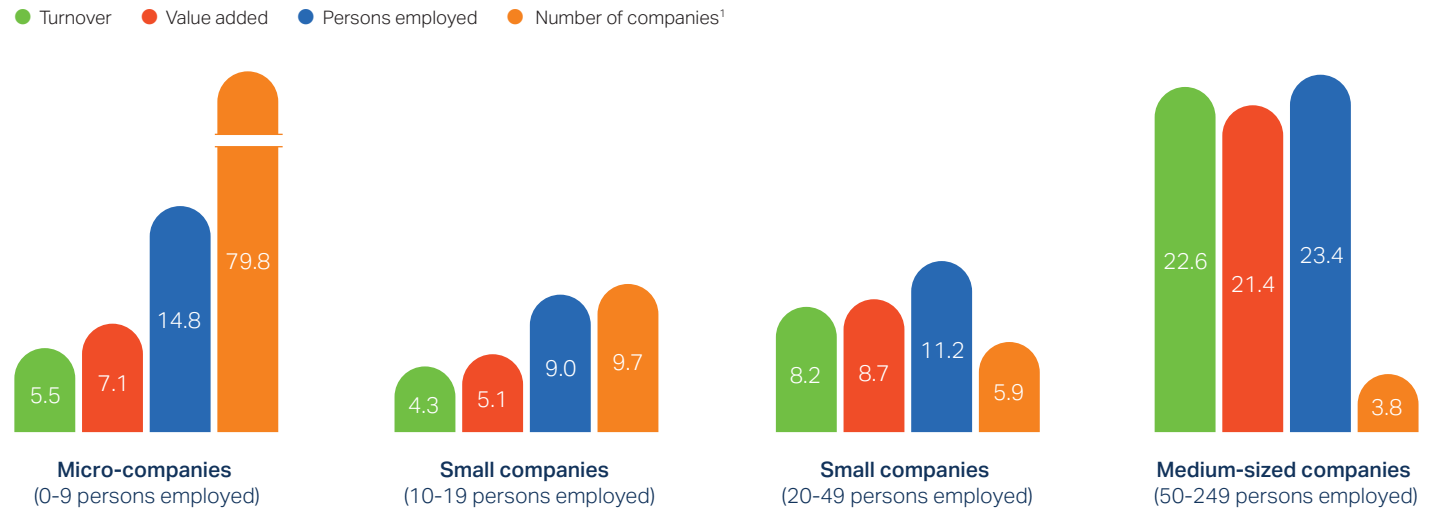

Small scale, big impact

- The food and drink industry is a highly diversified sector with many companies of different sizes.
- SMEs generate more than 40% of the food and drink industry turnover and value added and provide more than half of jobs in the sector.
- The food and drink industry accounts for almost 290,000 SMEs.

# THE NATIONAL PICTURE

A key industry in the economies of the EU Member States

## #1 employer

The food and drink industry is the biggest employer in manufacturing in half of the Member States

## 63%

Share of turnover of the EU's 4 largest food and drink producers

- The food and drink industry ranks among the top three manufacturing industries in terms of turnover and employment in most Member States.
- France, Germany, Italy and Spain are the largest EU food and drink producers by turnover.

# BIOECONOMY

The food and drink industry: a main contributor to the bioeconomy

**5.3%**

Contribution of the bioeconomy to EU gross value added

**8.9%**

Share of the bioeconomy in EU employment

- The turnover of the bioeconomy amounts to €2.2 trillion and the value added to €613 billion. The food and drink industry contributes to roughly half and one-third respectively.
- In 2017, the bioeconomy employed 17.5 million people in the EU, of which one-quarter was in the food and drink industry.
- The Horizon Europe Research and Innovation programme of the European Commission will invest €8.95 billion in the Cluster 6 of the programme, dedicated to Food, Natural Resources and Agriculture in the next 7 years (2021-2027).

# FOOD SUPPLY CHAIN

Diverse economic operators with specific business models

## 5.8%

Share of the food supply chain in EU gross value added

## 10.8%

Share of the food supply chain in EU employment

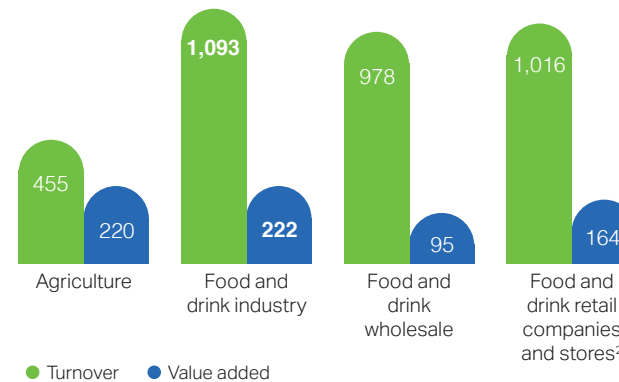

- The food supply chain employs 21 million people.
- The total turnover amounts to €3.5 trillion and the value added to €701 billion.
- The EU extensive food supply chain, from agriculture and the input industry to food and drink services, employs 30 million workers.

# CONSUMPTION

Food and drinks<sup>1</sup>: the second largest household expenditure

**€1,580bn**

EU household expenditure on food and drinks

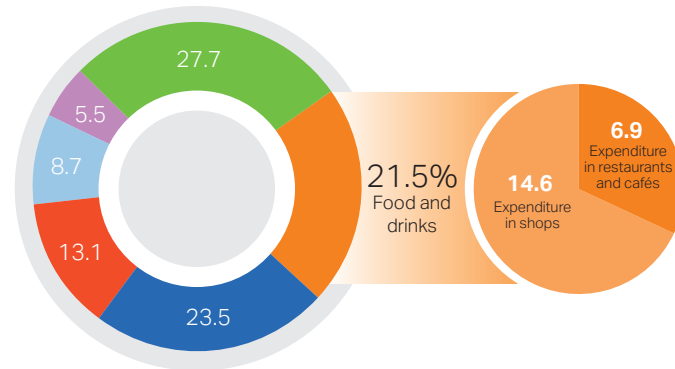

**21.5%**

Average share of EU household expenditure on food and drinks

- In 2019, EU consumers spent €1,580 billion, or 21.5% of their budget, on food and drinks, either purchased in shops or consumed in restaurants and cafés. Out-of-home consumption represents one-third of consumer spending on food and drink products.
- Across Member States, the share of overall household expenditure on food and drink products varied from 17% to 29% (11% to 25% when considering only food and drinks purchased in shops).

# CONSUMER EXPECTATIONS

Public knowledge of the current food system and consumer appetite for change

## 45% taste

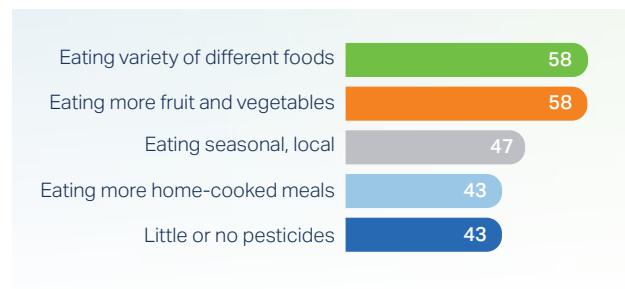

The main factor influencing consumer purchases

- Taste (45%), food safety (42%) and cost (40%) are the main factors influencing Europeans' food purchases.
- Europeans consider food being healthy for them (74%) as the most important aspect of a sustainable diet, far above all other aspects such as minimising waste.
- Two-thirds of Europeans say that they eat a healthy and sustainable diet most of the time (56%) or always (10%).
- Affordability of healthy and sustainable options (49%), having healthy food choices available where they usually shop for food (45%) and clear information on food labelling regarding a product's impact (41%) would help citizens in adopting a healthier and more sustainable diet.
- Almost 9 out of 10 Europeans consider that farmers and food companies should themselves take action to raise their products' sustainability standards.

# EU<sup>1</sup> QUALITY SCHEMES

Protecting and promoting the geographical origin as well as traditional know-how of food and drinks<sup>2</sup>

**7%**  
The share of GIs and TSGs in the overall sales of European food and drinks

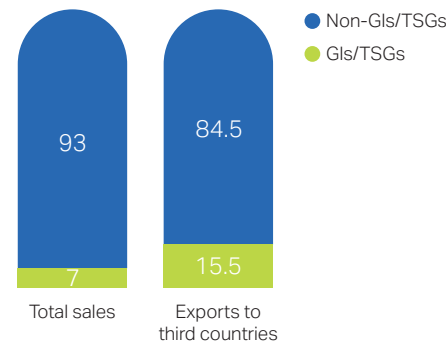

**15.5%**  
The share of GIs and TSGs in the overall European food and drink exports to third countries

- In 2017, 3,207 product names were protected in the EU. Each Member State produced Geographical Indications (GIs) and Traditional Specialities Guaranteed (TSGs) foodstuffs.
- GIs and TSGs all together accounted for an estimated sales value of €77.1 billion in 2017. More than half of this value derived from wines.
- The national market was the first outlet for GIs and TSGs. Exports to third countries amounted to €17 billion, representing 22.1% of the total GIs and TSGs sales.
- The sales value of GIs and TSGs was, on average, double the sales value for similar products without a certification. The value premium rate stood at 2.9 for wines, 2.5 for spirits and 1.5 for agricultural products and foodstuffs.

<sup>1</sup> EU28

<sup>2</sup> Under the EU quality policy, product names can be granted with a Geographical Indication (GI) if they have a specific link to the place where they are made. GIs include Protected Designation of Origins (PDO) and Protected Geographical Indications (PGI). Traditional Speciality Guaranteed (TSG) highlights the traditional aspects such as the way the product is made or its composition, without being linked to a specific geographical area.

# SUSTAINABILITY

Delivering more sustainable food systems

**5th**

Rank of the food and drink industry<sup>1</sup> in terms of GHG emission in manufacturing

- The EU food and drink industry emits 85Mt CO<sub>2</sub>e per year (2015). Most of these emissions are associated with energy use. From the electricity grid, 62% of energy use is consumed as heat and 38% as power.
- In the EU, an estimated 20% of total food produced each year is lost or wasted. Households generate more than half of total food waste in the EU (47 million tonnes).
- In 2019, almost 8.5% of the EU's agricultural area was farmed organically, 2.5 percentage points more than in 2015. Austria leads with 25% of its agricultural area farmed organically, followed by Estonia and Sweden.
- In the EU, 41% of plastic packaging waste was recycled in 2018, 10 percentage points more than in 2008. In eight Member States, more than half of the plastic packaging waste was recycled.

# INNOVATION AND CONSUMER TRENDS

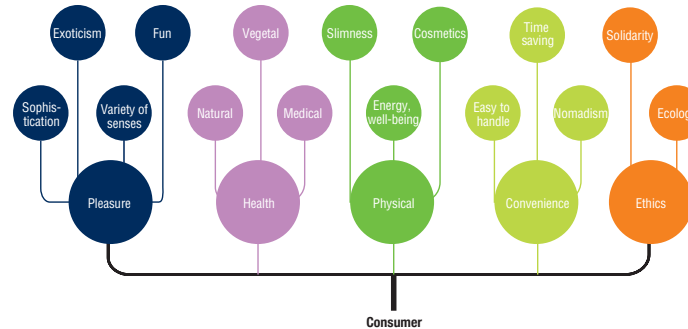

Innovation key to greater consumer choice

**Pleasure**  
Leading driver of food innovation in Europe

**#1**  
Soft drinks are the world's most innovative food sector

- Drivers of innovation can be divided into 15 trends, grouped along five axes, corresponding to general consumer expectations: pleasure, health, physical, convenience, and ethics.
- Pleasure was the leading driver of food innovation with a 46.5% share in 2020.
- Health, which ranked second, is slightly declining while Ethics continues to grow and gained 3.7 percentage points, driven by the Ecology trend.
- In 2020, soft drinks were the world leaders in innovation, with frozen salted products ranking second. The dairy products category came in a close third place and took the place of catering products.

# TRADE WITHIN THE SINGLE MARKET

The first market for EU food and drinks

**€236 billion**  
Intra-EU exports

**€145 billion**  
Extra-EU exports

**€381 billion**  
Total EU exports

- More than 60% of EU food and drink exports are destined for the Single Market.
- Germany is the EU Member State with the highest value of intra-EU trade in food and drinks.
- Except for drinks, the exports of most sectors to the Single Market exceed those to third countries.

# TRADE FIGURES

International trade: providing opportunities for growth and jobs

**€145 billion** Exports

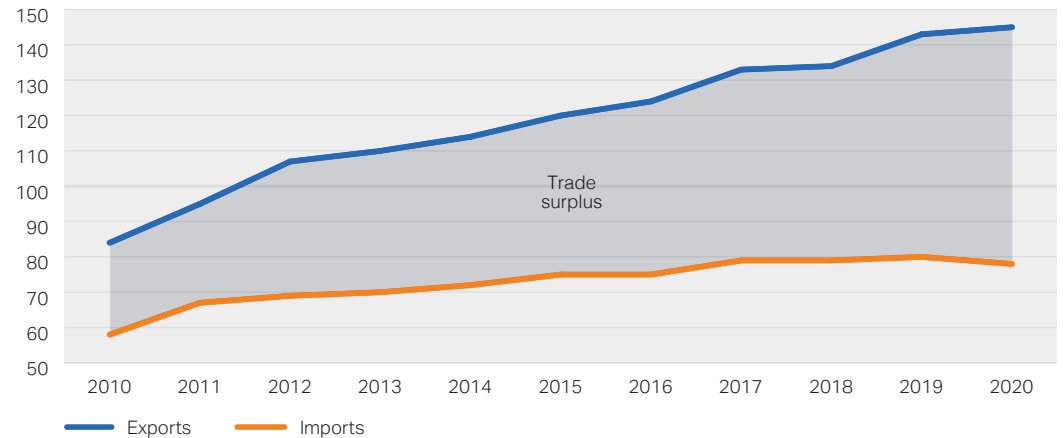

**€78 billion** Imports

**€67 billion** Trade balance

- Close to 40% of Member States' total food and drink exports were sold to non-EU markets. During the 2010-2020 period, extra-EU exports increased on average by 5% per year, compared to 3% per year for intra-EU exports.
- EU food and drink exports increased for the 11<sup>th</sup> consecutive year (+1% compared to 2019), representing 7.5% of total EU exports of goods. Imports amounted to €78 billion (+2% compared to 2019). This makes the EU a net exporter with a trade balance of €67 billion.
- Exports to China reached a 2<sup>nd</sup> consecutive year of double-digit growth and also increased with several other key trading partners. Meanwhile, exports towards Japan, Russia, and the US declined (2019-2020 period).
- USMCA countries (US, Canada, Mexico) remain by far the EU's largest trading partner by region, followed by the Greater China region.

<sup>1</sup> Exports and imports refer to extra-EU trade, unless otherwise specified

# TRADE FIGURES BY PRODUCT

Providing high-quality, value-added food and drinks worldwide

>100

EU food and drink product categories exported

>200

Export markets

- Wine and pork meat are the EU's key exports, with each exceeding a value of €10 billion in 2020.
- On the export side, double-digit growth was registered for pork meat and animal feeds, and pet food. In contrast, spirits encountered a double-digit percentage decline in exports followed by lower levels observed for other key products such as wine and chocolate. This fall in exports is most likely due to the challenges of Brexit and the Covid-19 pandemic.
- On the import side, palm oil, food preparations, prepared and preserved fruits and nuts, and coffee (decaffeinated or roasted) increased while imports of spirits, juices, several categories of fish products, and wine declined.

## TOP 10 EU FOOD AND DRINK EXPORTS AND IMPORTS BY DESTINATION AND ORIGIN (2020)

### Exports

	€ million	% change 2019-2020	Top 3 destinations

# EU POSITION IN GLOBAL FOOD AND DRINK TRADE

A leading player on the world stage

## #1

Exporter of food and drinks

## #3

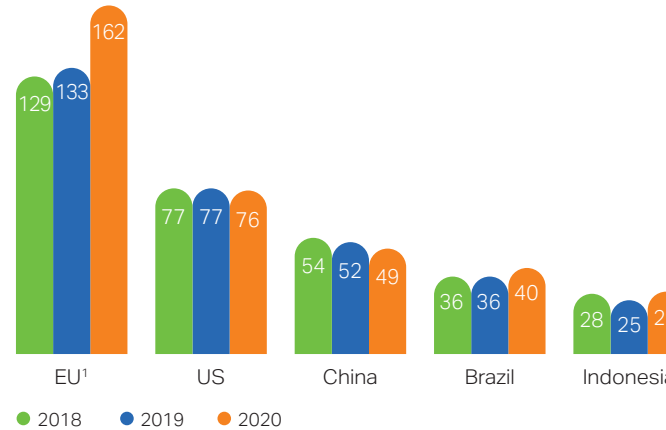

Importer of food and drinks

- With the departure of the UK from the EU, the EU has become an even larger exporter of food and drinks than before.
- The EU now ranks in third place in terms of imports from the rest of the world, behind China and the US and ahead of the UK and Japan.
- The recent five-year performance of EU products imported by selected third countries was mostly positive, particularly the growth of the EU share in food and drink imports by Brazil (+5.4%), Switzerland and Australia (+3%), Korea (+2.4%), Canada (+2.3%) and Norway (+1.5%).

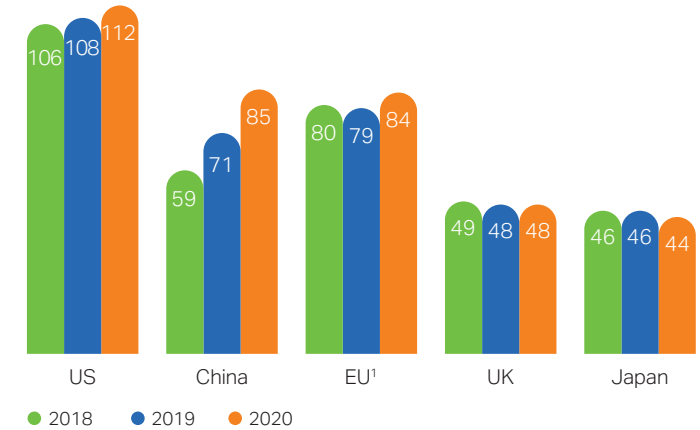

<sup>1</sup> Takes into account the change in Member State composition of the EU.

<sup>2</sup> No data for Russia, year 2020

# EU-UK TRADE

Major trading partners with closely integrated supply chains

**€33.3 billion**

EU food and drink exports to the UK

**€13.5 billion**

EU food and drink imports from the UK

**€19.8 billion**

EU-UK trade balance

- EU exports of food and drinks to the UK amounted to €33.3 billion in 2020. The UK ranks first in terms of export market, ahead of the US (€19.7 billion) and China (€16 billion).
- Among the EU Member States, Ireland has by far the strongest trade link with the UK. Close to 35% of Ireland's food and drink exports are destined for the UK and more than 50% of its imports come from the UK.
- Wine is the EU's most prominent product exported to the UK, while distilled spirits lead the imports of food and drinks from the UK.

## KEY MEMBER STATE EXPORTERS OF FOOD AND DRINKS TO THE UK (2020)

Member State	Exports to UK (€ billion)	Share of Member States' total exports <sup>1</sup> (%)	Rank of UK as export destination
Netherlands	5.3	8.7	4
France	4.6	10.1	3
Ireland	4.4	34.6	1

# FOOD FUTURE

## Achieving the United Nations Sustainable Development Goals

**9.7 billion**

Global population in 2050

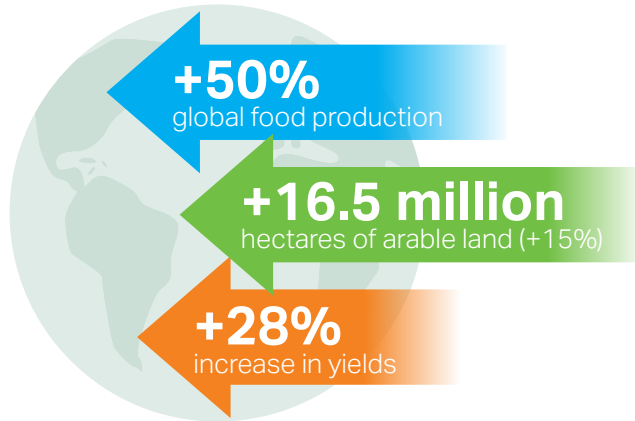

**50%**

Increase in global food production by 2050<sup>1</sup>

- Population and income growth will continue to drive food demand. Meeting the additional demand will depend on the availability and productivity of resources.
- Addressing hunger, malnutrition in all its forms and food production are key to meeting the goals of the 2030 Agenda for Sustainable Development. The UN Food Systems Summit, held on 23 September 2021, aims to contribute to these objectives by transforming global food systems.
- Food production and nutritional security were the highest priority areas for adaptation identified in the national contributions of countries within the Paris Climate Agreement context.
- Forests cover a third of the world's land but are in serious danger from deforestation and forest degradation. Since 1990, the world's forests shrank by 1.3 million square kilometres, an area larger than South Africa.

# GLOBAL TRENDS IN R&D

## Sustained levels of R&D investment

**0.16%**

EU<sup>1</sup> R&D private investment intensity

- Out of the world's top 2,500 companies for R&D private investment, 60 operate in the food and drink industry. Together, these companies invested €9.5 billion in R&D in 2019, €1.9 billion of which was invested by 11 food and drink companies based in the EU.
- These 11 EU companies are located in the Netherlands (3), France, Ireland and Germany (2), Belgium and Denmark (1).
- The EU<sup>1</sup> food and drink industry<sup>2</sup> has a lower R&D investment intensity when compared with several food and drink industries worldwide.
- Across EU Member States<sup>1</sup>, R&D investment intensity varies from 0.50% to 0.01%.

<sup>1</sup> Based on available data

<sup>2</sup> Including tobacco

<sup>1</sup> Based on the most recent complete fiscal year

<sup>2</sup> Figures have been converted to Euro with ECB bilateral annual exchange rates series, but only figures in the original currency are relevant

<sup>3</sup> Operations in the EU refer to the presence of processing plants in one or more Member States

# GLOSSARY

## Gross value added (GVA)

The gross value added is the value of goods and services produced by a sector minus the cost of the raw materials and other inputs used to produce them. GVA measures the contribution to the economy of each individual sector.

## Investment

Investment is defined as investment during the reference period in all tangible goods. Investments in intangible and financial assets are excluded.

## Labour productivity

Labour productivity provides a measure of the efficiency of the workforce to produce goods and services. Labour productivity is calculated as the gross value added (GVA) divided by persons employed.

## Persons employed

The number of persons employed includes the total number of persons who work in the observation unit (including of working proprietors, partners working regularly in the unit and unpaid family workers), as well as persons who work outside the unit who belong to it and are paid by it (e.g. sales representatives, delivery personnel, repair and maintenance teams).

## Small and medium-sized enterprises (SMEs)

For Eurostat's Structural Business Statistics database: micro = less than 10; small = 10 to 49; medium-sized = 50 to 249; large = more than 250 persons employed. The SBS size-class data are solely based on the definition relating to the number of persons employed and not to the turnover level.

## Value added

The value added at factor costs is the gross income from operating activities after adjusting for operating subsidies and indirect taxes.

## Wages and salaries

Wages and salaries are defined as the total remuneration, in cash or in kind, payable to all persons counted on the payroll (including homeworkers), in return for work done during the accounting period regardless of whether it is paid on the basis of working time, output or piecework and whether it is paid regularly or not.

## Abbreviation of world regions

### ACP

African, Caribbean and Pacific countries

### Andean Group

Bolivia, Colombia, Ecuador and Peru

### ASEAN (Association of Southeast Asian Nations)

Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand and Vietnam

### Central America

Panama, Guatemala, Costa Rica, El Salvador, Honduras and Nicaragua

### CIS (Commonwealth of Independent States)

Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine and Uzbekistan

### EFTA (European Free Trade Area)

Iceland, Liechtenstein, Norway and Switzerland

### EU

EU refers to EU27, unless otherwise specified

### GCC (Gulf Cooperation Council)

Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates

### Greater China region

China, Hong Kong, Macau and Taiwan

### Mercosur

Argentina, Brazil, Paraguay and Uruguay

### Southern Mediterranean region and Turkey

Algeria, Egypt, Israel, Jordan, Lebanon, Libya, Morocco, Palestine, Syria, Tunisia and Turkey

### USMCA countries

US, Mexico, and Canada

### Western Balkans

Albania, Bosnia-Herzegovina, Kosovo, North Macedonia, Montenegro and Serbia
